WALL WAITER

Design by García Cumini

- DESCRIZIONE / DESCRIPTION

Wall Waiter è un innovativo modulo polifunzionale. Contiene e organizza molti oggetti della cucina. Il frontale a ribalta lo trasforma in un piano d'appoggio supplementare mentre la luce led integrata illumina sia il piano che gli accessori più utilizzati. I moduli possono vivere singolarmente, in linea o in colonna, per una massima progettualità.

Wall Waiter is an innovative multi-functional module that can hold and organise many of the objects used in the kitchen. The pull-down front becomes an extra shelf while the integrated led light illuminates the worktop and the accessories used most frequently. The modules can be used on their own, in a line or one on top of the other for utmost planning freedom.
